What you will learn in APK:

This is the work that will ignite your healing practice. Illness typically has an origin in Unresolved Psycho-Emotional Conflicts. In most cases these conflicts are rooted in traumatic events from early childhood. Applied Psycho-Kinesiology (APK) uses the signals of the body to uncover the psycho-emotional causes and prioritize treatment. Physical symptoms and mental stress indicate that a conflict wants to be resolved. A therapist can assist this process using muscle testing skills to identify the conflict's origins. The repressed – unconscious event can then be accessed and remembered consciously by the patient. The therapist guides the patient with imagery, dialogues, forgiveness and gratitude to release the conflict. Finally, old limiting beliefs can be replaced by new and liberating beliefs. Illness has the ability to resolve as the autonomic nervous system unwinds. Biological treatments and other interventions can now be effective if still needed.

Instructor, Lisa Baas L.Om, will guide us, using our skills with Muscle Testing – to assess blocks to healing on this level.

Small Group work with hands on instruction assisted by our Certified practitioner team. You will leave ready to work on this level immediately with patients.

Topics Covered in the Workshop

The Limbic System

- Uncoupling conflicts , Limiting Beliefs , How restricting beliefs work
- Liberating beliefs
